

## Conquest Custom Computers

As IT Consultants, we have been implementing and managing IT environments for nearly 10 years. Over those years, we have learned how to think outside the box and provide computers that fit YOU and YOUR BUSINESS.

To do this, we custom build each workstation, server, and laptop for your business. Since we supply all the parts that go in the computers, we are able to provide rock-solid machines that are under warranty with us - an Atlanta based company. If you ever have trouble with any of your machines, there is not need for costly downtime. We stock all parts and can have you back up and running the same day. Although we have a very low hardware failure rate, we are prepared to fix our computers if a problem ever arises.
